Look Ahead

The watery winter sun, low in the sky,
casts long shadows across the barren land
where once the wheat and barley grew waist high
the snow lies thick upon the furrowed ground.

The trees have lost their autumn gown of gold
and now stand naked and alone,
completely at the mercy of wind and cold,
and with each bitter gust they creak and groan.

But as the long dark days go slipping by,
first the snowdrops, then the crocus appear.
The clouds which once hung low, soar up on high
then winter's gone and vibrant spring is here.
