Final journey home!

the 1990s, the number of people with a disability in the United States has increased by 50% (U.S. Census Bureau 1997).

As a result of the increase in the number of people with disabilities, the need for accessible information has become more acute. The National Center for Accessible Information (NCAI) has estimated that the number of people with disabilities who need accessible information is 100 million (NCAI 1998).

One of the most important areas of accessible information is the area of accessible electronic information.

Electronic information is information that is stored in a digital format and can be accessed through a computer. Electronic information can be accessed through a variety of devices, including computers, mobile phones, and PDAs.
